INTRODUCTION

After going through the distance studies options for university, I realised how difficult it was. And I couldn't understand why. Why is it that when you are trying to improve your life, it's not only expensive, but you can't seem to find decent resources anywhere? Lecturers never answer emails or phone calls, and tutor classes just cost more money.

It became my dream to improve this method in South Africa and Namibia. I wanted to offer affordable education to those that cannot afford tertiary education any other way, while at the same time providing a service that is outstanding. We live in a modern age where technology has opened doors. This, I believe, should open opportunities.

Imperium is aimed at the working student. We aim to provide resources that will answer all questions, interactive time with lecturers, and on top of this an international accredited degree - because you are worth it. For committing to studying whilst working and keeping up with all your other responsibilities, we would like to reward you. You can work hard and achieve great results now, while also opening doors globally. With an Imperium degree you can work anywhere in the world. Wherever the opportunities may lead you, there will be nothing holding you back now. No more saying no or postponing - now you can do it all. And now is a good time to start.

Mission

At Imperium University we want to offer affordable higher education to working individuals through visual mediums, giving them the total "classroom feeling" at a time convenient to each individual. We aim to create a medium for personal success through diversity and equity in employment. Individuals can embark on career-related education and training.

Vision

Providing Higher Education that is affordable, yet of imperative value. Starting with Commercial and Education degrees offered from Bachelor's to Master's level, as well as bridging courses to those who lack exemption. In the long term we will be adding on Science, Medicine and Engineering degrees to the program.

Objective

Imperium University wants to provide the ultimate education for part-time students that have to work in order to pay for their studies. We would like to provide them not just with an internationally-accredited degree, but also provide a support system that guides them thoroughly through each module. Our goal is to have weekly videos for the students that will make them feel as part of a classroom. With an interactive whiteboard, students and lecturers will be able to communicate and resolve any issues that pop up within the module.

No more than 1 multiple choice assignment will be given in a semester, as a written assignment provides a much better view of a student's ability and understanding of the work that was covered. This way, students and lecturers will know what to expect in the exams as well as identify any problem areas way in advance. This will also provide Imperium University with a better qualification, making us the ultimate online part-time university.

"The ability to read, write, and analyze; the confidence to stand up and demand justice and equality; the qualifications and connections to get your foot in the door and take your seat at the table—all of that starts with education."

—Michelle Obama

REGISTRATION PROCESS

Use the search function to browse the courses available, take a look at the modules you will be introduced to throughout your course, the minimum requirements and the career options.

Students that do not qualify for the minimum requirements may apply for bridging courses, accompanied by a written motivation from the student.

Students that have questions regarding their studies or that would like career advice can book a Skype session with one of our advisors. We also have a career interest test available at <https://www.imperium-uni.com/interests>. This quiz is free to all and can be taken at any time.

Once you are ready to apply, complete the application form. Students are allowed up to 3 selections per application. Attach all required documentation and pay the registration fee of R/N\$ 150.

Once the application form and fee is received, you will receive an email to confirm the processing of your application.

Upon approval of your application, you will receive an email from the Dean containing your student number and all relevant information for the process ahead.

If you have any questions regarding your application, you can email studentaffairs@imperium-uni.com.

ASSIGNMENTS, TEST AND EXAMS

Assignments

Each subject will contain 2 assignments per 6-month period with one exam paper. No more than one multiple choice assignment will be given per subject as a written assignment provides a much clearer overview of a student's understanding.

There are however informal assessments at the end of each unit where students can track their understanding of the unit as well as enter into discussion with the lecture and fellow students on the topics studied.

Lecturers also provide detailed feedback after formal assignments to help students reach their maximum potential in the exams.

Exam Process

All students will need to register an invigilator for their exams. An invigilator can be anyone that is not a family member or close friend. The duty of the invigilator is to invigilate all official exams for the student on behalf of Imperium University.

Invigilators will ensure that exam procedures are followed at all times. In the case of unethical behaviour, both the student and the invigilator will be held accountable.

Invigilators need to complete the invigilation course to obtain their own invigilation number. This course is free and will not result in any additional fees. A student can also register multiple invigilators over the course of their studies.

For more details, please visit <https://www.imperium-uni.com/invigilator>.

APPLICATION KNOW-HOW

Registration Deadlines

As Imperium is an international university, we run 2 academic years with 2 semesters each.

Students that register for the January - December academic year can register to start with their studies in either January or July of each year.

- Deadline for January registration - 30 November
- Deadline for July registration - 31 May

Students that register for the September - August academic year can register to start with their studies in either September or March of each year.

- Deadlines for September registration - 31 July
- Deadlines for March registration - 31 January

For more details please visit www.imperium-uni.com or email studentaffairs@imperium-uni.com.

Calculating Your Minimum Required (MR) Score

Your MR Score will be calculated using your top 5 subjects.

MR Score	A-Level	AS-Level	IEB / NSC / NSSC / GED	IGCSE
9	80-100			
8	70-79	80-100		
7	60-69	70-79	80-100	90-100
6	50-59	60-69	70-79	70-89
5	40-49	50-59	60-69	60-69
4	30-39	40-49	50-59	50-59
3	0-29	30-39	40-49	40-49
2		0-29	30-39	30-39
1			0-29	0-29

Students completing a GED need to submit a motivation for their anticipated studies. To calculate their MR Score, GED students will double the score of their best subject to give them a 5-score total.

Applicants that do not meet the minimum requirements will be temporarily accepted on condition that bridging subjects are successfully completed in the first 6 months of the course.

- Convenient
- Internationally accredited

UNDERGRADUATE PROGRAMS

A student will be considered for admission when they are in possession of a certificate that is the equivalent of a Grade 12 in South Africa. When a student has already graduated from another tertiary institution, the student will be accepted on those qualifications.

Degrees consists of multiple year/semester modules over a minimum of 3 years.

A maximum of 7 years will be given to a part-time student to finish each degree with a minimum of 3 subjects passed in the first year and 2 in the years that follow.

FACULTY OF ARTS

The Department of Arts is focused on research, engagement with the community and delivering a true contribution to its immediate environment.

The Faculty of Arts, however small, offers outstanding programs with leading course material in its fields. With one of the first faculties to really emphasise its study into neuroscience, we aim to be world leading.

Throughout our courses we aim to contribute to the development of society, making a real difference in the lives of those we come into contact with. A Bachelor of Arts is not just a degree, it's a key to wellness sharing. This degree gives you the tools to enlighten the path of those you come into contact with. Whether it is sharing a story of importance or offering guidance to someone in need, we aim to give you the tools needed to be of help in whatever society you choose.

BA Editing

Total MR-Score	English Requirement
23	MR-Score: 4

Core modules

1 st Year	2 nd Year	3 rd Year
Digital Media	Data Journalism	Editing
History of Journalism	Media Research Methods	Publishing Studies

Law and the Media	Communications I	Sport and the Media
Global Communications		

Career options include:

Sport Communication, Sport Journalist, Digital Strategy in Sport, Marketing Manager in Sport Area, Public Relations Professionals

FACULTY OF ECONOMICS AND MANAGEMENT

Many students talk about studying a BCom degree, but what does that actually mean? A Bachelor of Commerce degree is a degree that will open doors for you in both the public and the private sectors of business. It will equip you with good commercial awareness needed in economics and management. It will also enable students to effectively apply their knowledge of industries to their job. Career options in Commerce are far more than those in any other bachelor's degree and not limited to only one path per department. Popular areas of employment for business and management graduates include business, finance and sales. Careers in consulting or teaching are other options with a range of fields.

Imperium University aspires to create course material that makes any part-time student feel they are receiving the equivalent of a classroom experience while keeping an international standard that allows them to travel the world. Our academic research is of international quality and our lecturers professionally accredited. We aim for market value in terms of education with a competitive edge students will not find anywhere else.

This faculty consists of 30 different degrees divided up into 14 departments: Accounting, Auditing, Actuarial Science, Economics, General, Banking, Communications, Business, Human Resource, Law, Logistics, Finance, and Taxation.

During the course of your studies you should gain the following skills:

- Analytical skills
- Communication skills
- Understanding of numbers
- Problem solving
- Ability to think logically
- Presentation skills
- Report-writing skills.

BCom Accounting

FACULTY OF EDUCATION

In a modern world and modern times, we have to adapt our way of teaching. Across the world students are now more tuned in with the newest technology and easily distracted by alternative methods. It is when faced with this problem that we decided to take the bull by the horns and create an education degree that will not just challenge the learners, but that will also end with a higher level of education in the classroom. An educational method that will inspire creativity, break the normal cycle and create learners with a passion for life.

Students in the Education Department are encouraged to do part-time teaching as a teaching assistant from day one and apply the knowledge gained from their studies to their surrounding activities. From using face-to-face methods to implementing digital media, students will be able to create a learning atmosphere that is ultimate for survival; Not only for them, but for their learners too.

Our Psychology with Education degree offers the same subjects for all majors in the first 2 years. Only in the 3rd year do we split pre-primary, primary, secondary and higher education. This is due to our main vision being the same for all departments: We would like to create creativity. Out the window go the basic teaching methods and in we come with developmental techniques that will help students not only adjust but also thrive in the cut-throat environment we send them into when they are done.

At Imperium University we create the most wanted teachers in the world. Teachers that are not just well prepared professionally or with the most knowledge of their subject area, but teachers that will be able to recognise and develop inspired students. Teachers that will form a vision in their students that will aid them in taking on the world. Teachers that form the most important part of their learners' base.

For those that would like to enter into a more formal educational environment, we offer Educational Studies. This degree is more focused on business training and the creation of teaching methodologies. The challenge teachers will face here is that most of their learners' base of education is already formed at this stage and it will be up to them to inspire creativity here.
